

Silent Period during license term

As fully explained in its silent STAs and 312(g) waivers, the station was silent from August 15, 2018 to January 8, 2021 as a result of many issues beyond the licensee's control including, among others, being displacement by T-Mobile USA in the digital repack and spectrum allocation; a devastating E4 tornado which hit Dayton Ohio and surrounding areas on May 27, 2019 which heavily damaged both the Station facilities and the owners personal residence; the unexpected sale of the tower and building at which the station was licensed to operate and the termination of the licensee's existing lease; delay in negotiating a new lease due to the absence for a protracted period of time by the new landlord; major delays in the delivery of equipment due to the Corona virus pandemic restrictions and travel bans and unavailability of tower and construction crews.
