

Engineering Special Temporary Authority Request

DTV America Corporation (“Licensee”) respectfully requests an Engineering Special Temporary Authority (STA) pursuant to the technical specifications listed in the application.

Public Interest Benefits. The station has been operating pursuant to the technical specifications listed in the application since 19 October 2020 under a granted STA (0000124875). The station inadvertently did not extend the Engineering STA which expired 19 April 2021. The station would like to continue operating under the listed parameters while construction is completed on the granted Displacement (0000051609). The Licensee is aware the Displacement authorization expires 13 June 2021 and is working diligently to complete the installation. The Licensee is firming up the delivery time of the needed antenna with the antenna vendor. Additionally, the Licensee has amended the lease with the tower owner and a structural analysis is being facilitated. The installation of this new antenna will allow for KZLL-LD to be combined with the commonly owned KUOC-LD.

Once the antenna is received and installed, the station will file the License to Cover to satisfy the Displacement. Grant of Licensee’s Engineering STA request promotes the public interest as it will allow KZLL-LD to continue to provide free over-the-air programming to the community and the surrounding area.

Conclusion. Licensee respectfully requests that the Commission grant this Engineering STA request for KZLL-LD.
