

WRLM-TV, Canton, Ohio (Fac. Id. 43870)
Renewal Application
Public File Explanation

Applicant has responded “no” to the public file timeliness question based upon the following.

WRLM’s Q2 2014 commercial limits certification reflects a 10/7/2014 upload date, which is the same date as the Q3 2014 certification and therefore may have been overwritten with a new date but was timely uploaded originally. In addition, WRLM’s 2014 EEO public file report was uploaded 3 days late on 6/7/14 and its 2015 EEO public file report was uploaded 7 days late on 6/8/2015. Finally, WRLM’s Q3 2016 Children’s TV Report shows a public file upload date of 10/11/16 but was timely filed by the 10/10/16, which was the Columbus Day holiday and therefore the filing deadline was moved to the next business day. The FCC’s internal systems therefore did not populate the report to the public file until 10/11/16.

Given its overall compliance during the 8-year term, WRLM requests that the late online public file uploads be considered *de minimis* in nature.
