

### **KZZX Online Public File**

All of the required documentation is currently included in the KZZX online public file, and most of such documents were posted when due.

Three exceptions are that the issues/programs list for the fourth quarter of 2018 and the first quarter of 2019 were not posted until July 11, 2019, and that the issues/programs list for the second quarter of 2019 was not posted in the online public file until October 5, 2019, at the time that the third quarter 2019 report was timely posted. All of these quarterly reports were timely prepared on paper and retained in the paper public file, but at the time that the report for the fourth quarter of 2018 was due to be posted, the Federal government was closed. After the postponed deadline was established, the station overlooked that deadline and the restored need to upload the reports to the online public file as well as to place them in the backup paper file. The omission of the second quarter 2019 report at the time that the earlier reports were posted was an oversight.

Further, the 2020 EEO public file report was posted two days late, on June 3, 2020.

Additionally, the EEO public file reports for three years at the beginning of the license term were uploaded only recently because the licensee did not realize that the reports for years prior to 2017 also needed to be uploaded. The reports in question are those for 2013-14, 2014-15, and 2015-16. These reports also were prepared in a timely manner and placed in the paper public file on time. Because the licensee did not understand that prior reports for the entire license term needed to be posted in the online public file as well, the earlier reports were not scanned and added to the online file.
