**ENGINEERING REPORT**

---

**WLZH-LD, to Baltimore, MD LPTV channel 14D Site-move Minor (Amendment)**

**ENGINEERING AMENDMENT**

**LMRS STATEMENT**

There are no technical changes proposed by this amendment. The applicant is simply providing information on the protected LMRS stations that appear on the TVStudy output.

WQFA917 (channel 14) has only two valid locations (Location 1 at N 40-33-16.0; W 74-54-14.0; and Location 4 at N 40-41-40.4; W 74-55-15.6) and these two locations are more than 110 kilometers from the proposed 52 dBu F50,10 contour.

The proposed 72 dBu F50,10 contour does not enter into Pennsylvania, thus protecting the following LMRS first-adjacent channel 15 stations (that are protected within Lancaster County only):

WQNI284, WQNI286, WQNI287, WQRB478.

WQVS780 (channel 15) is licensed to Lancaster County, PA and has one location (at N 39-47-45.0; W 76-11-27.5). As stated above, the proposed 72 dBu F50,10 contour does not enter into Pennsylvania. Also, the predicted F50,10 signal at this one location of WQVS780 is reduced by approximately 11 dB – to 55 dBu.

Based on the above, each of the LMRS stations listed on the TVStudy output are fully protected by this proposal.
