

W250CV Request for Expedited Processing

The current CP previously provided time for a comments. This proposal simply proposes a reduction of RC-AMSL to facilitate installation without other changes.

It has been established in the “W250CV CP-Mod Engineering Statement” that the proposed 60dBu contour is completely enveloped within the 60dB contour of the current CP, as observed in Figure 1 therein. Additional delay is not necessary.

The applicant requests expedited processing of this instant application to allow construction ASAP, which we believe to be in the best interest of the public.
