

**FCC Form 303-S  
Online Public File Certification**

As part of an October 2020 review of its online public inspection file, the Station discovered that it failed to upload certain materials by the applicable deadline. After learning of this oversight, the Station took steps to remedy the issue. In particular, the Station uploaded several quarterly Issues/Programs lists for the first quarter of 2018 through the third quarter of 2020 that had not been previously posted to the file. The Station also uploaded donor lists for FY 2013 through FY 2020 in January 2021.

The Station has put in place protocols to ensure that required materials are uploaded to the online public inspection file in compliance with applicable deadline. The Station also has reviewed the filing requirements of Section 73.3526(e) with outside counsel. And the station will continue to initiate and rely upon periodic public file reviews to ensure ongoing adherence to the Commission's rules.
