

Americom KRNO License Renewal Application Exhibit 1

During this past license term, Americom Limited Partnership (“Americom”), licensee of radio broadcast station KRNO, due to inadvertent error, did not timely upload to its FCC online public inspection file the following documents:

- (1) Quarterly issues and programs lists for 2018 Q4 and 2021 Q1; and
- (2) Certain political advertising orders generated in 2018, 2019, and 2020.

Americom notes that it uploaded the two late-filed quarterly issues and programs lists promptly upon discovery of the errors, one within three weeks of the deadline, and the other less than a month and a half late.

With respect to the late-filed political advertising orders, Americom is updating its practices and policies in a good faith effort to ensure that future political advertising documents are timely placed in the online public inspection file.
