

FCC Form 2100, Schedule 303-S
Online Public Inspection File

Out of an abundance of caution, Nevada Public Radio reports the following with regard to the timely placement of documents into the station's public inspection file. The station's online public inspection file is now complete with all required items, and all items were added when originally due to the station's paper public inspection file or the station's online public inspection file, as applicable over the course of the current license term; however, as of the March 2018 deadline to transition from the paper public file to the online public inspection file, the station had only transferred issues and programs lists dating back to the start of 2016. As soon as it became aware of this issue, the station also transferred to the online public file its previously prepared older issues and programs lists for the license term, which had been part of the station's paper public file at the studio location. The station regrets the delay in the appearance of these reports in the online public inspection file, but submits that these items were added to the public file when originally due and that the online public file is now complete with all required materials.
