Minor Modification To Construction Permit K268DQ  
Facility ID#202468  
.25 kW Horizontal and Vertical  
Cleburne, TX**

**Special Conditions**

SIGA Broadcasting Corporation ("SIGA") is the license of the AM station in question, KHFX. As stated in the application for minor change, "*This proposal is to construct the facility using the existing 65 foot STL tower at KHFX (AM) instead of mounting on one of the towers in the KHFX directional array*". The sole reason for this modification is that this an existing tower with existing transmission line that would not disturb or have any effect on the directional array. The former STL tower is not used as an element in the directional array and was present with this same identical transmission line when the last directional proof of performance measurements were done.
