

**Resumption of Operations Notification**

The instant notification is being filed to notify the Commission that TV translator W03AK-D has resumed normal, licensed operations following installation of a filter and adjustment to the antenna that has restored the ability of the facility to receive co-owned WYFF's channel 30 over-the-air signal. As noted in our prior filing, a channel 31 facility went live around April 14, 2021, and prevented W03AK-D from receiving the over-the-air channel 30 signal of WYFF. The parties worked cooperatively and collaboratively to resolve the issue. As a result, the silent STA (*see* LMS File No. [0000143822](#)) is no longer necessary.
