

## **KAGJ-FM Public Inspection File**

KAGJ-FM experienced a lapse in electronically filing Issues/Programs List after a computer failure. Following multiple failed attempts to regain access to the electronic public inspection file, Issues/Programs lists were kept in a physical public inspection file at the licensed facility. We recognize the importance of filing these papers electronically and in a timely manner with the FCC. We have since taken steps to receive proper instruction and implemented a backup plan to make the corrections necessary to avoid repeating this problem in the future.
