

W26EQ-D– Request for Tolling of Construction Permit

WJAC Licensee, LLC, (“WJAC”), licensee of station W42DG-D, FIN 168229, hereby requests tolling of its construction permit (File No.: 0000143002) (“CP”), due to circumstances beyond its control. The referenced construction permit was issued in connection with displacement from channel 42 to channel 26 and will expire on June 12, 2021. The tower owner recently informed WJAC that structural analysis is required before antenna installation. Analysis is in progress and should be completed soon. WJAC purchased the antenna and will be able to install it on the tower once the studies are complete and tower owner’s concerns have been addressed. WJAC requests a brief 31-day tolling of its construction permit from June 12, 2021 until July 13, 2021, due to this unexpected last-minute requirement. WJAC was aware of the March 15, 2021 deadline for filing an extension of digital construction permits but, at the time, had no reason to believe that an extension would be necessary. Therefore, to the extent necessary, WJAC also requests waiver of the CP extension filing deadline.
