

Multiple Ownership Exhibit

This application proposes the transfer of control of 4 commonly owned FM stations. Attached are exhibits from a 2007 construction permit application (BPCT- 20071221ADM) showing the stations serving the area served by the stations being transferred. As shown by Figure B, the market created by these 4 stations is served by 24 stations. As the ownership of 4 FM stations is permitted in a market with only 15 stations, and as the applicant believes the coverage of the other stations in the market remain substantially the same as depicted in this 2007 exhibit, the common ownership of these 4 stations remains permissible under Section 72.3555 of the Commission's rules.
