

### **Statement Regarding Construction Permit Application**

Iglesia Pentecostal Vispera Del Fin (“IPVDF”), licensee of K23KI-D, Seattle, WA (Facility ID 181463) (the “Station”) hereby submits this minor change application to specify a new transmitter site for the displaced facility specified in its Construction Permit Authorization (“CP Authorization”) (File No. 0000052239) which is set to expire on July 6, 2021. The Station was forced to change channels due to being displaced by Station KRIO-TV in connection with the Incentive Auction (File No. 0000025164).

As explained in IPVDF’s pending STA Request and Section 312(g) Waiver Request (File No. 0000116523), equipment delays resulting from COVID-19 pandemic and the loss of the tower site specified in the CP Authorization has forced the station to remain silent until the necessary equipment could be delivered, and a new tower site could be located.

As specified in the concurrently-filed extension request, IPVDF has identified a new tower and is proposing in the instant application to commence operating at the new transmitter site upon Commission approval. In addition, IPVDF will be filing an engineering STA Request to specify the new site and related technical facilities so that IPVDF can resume operating the Station on its new channel as soon as possible.
