Mr. Wilson

We are writing to you on behalf of Developers & Managers Group, LLC ("Developers & Managers Group"). Developers & Managers is the owner of the following FCC low power digital television stations: K38NR-D, K45IY, and K45IM-D. Please see attached letter for your response. Thanks very much for your assistance.

BY: EMAIL

May 22, 2018

Mr. Dan Wilson, Sr. Manager  
Spectrum Engineering  
[SpectrumClearing@T-Mobile.com](mailto:SpectrumClearing@T-Mobile.com)

Dear Mr. Wilson:

We are writing to you on behalf of Developers & Managers Group, LLC ("Developers & Managers Group"). Developers & Managers is the owner of the following FCC low power digital television stations: K38NR-D, K45IY, and K45IM-D.

Developers & Managers Group is an African American company located in Baton Rouge, LA. Over the past few years Developers & Managers Group has invested over \$150,000 to purchase and convert the stations from analog to digital. The money was borrowed from the Louisiana Community Development Capital Fund, Inc. ("Capfund") an African American financial institution licensed by the United States Department of the Treasury CDFI Fund.

Developers & Managers Group has received two letters of notification from T-Mobile dated April 27, 2018 and May 10, 2018 informing the Company that T-Mobile is preparing to commence operations on its 600MHz spectrum in the Partial Economic Area ("PEA") #189 by 9/7/2018 and K38NR-D, K45IY, K45IM-D are likely to cause harmful interference to T-Mobile's operations.

The letter states that FCC regulations require Developers & Managers Group to cease operations or eliminate the potential for harmful interference to T-Mobile's wireless facilities in the PEA# 189 market. The letter further states that the FCC will work with the Company.

Enclosed with your letter of notification was a letter dated July 17, 2017 from Steve B. Sharkey, Vice President, Government Affairs, Technology and Engineering Policy, T-Mobile USA, Inc. (202) 654-5900 addressed to Ms.

Mr. Dan Wilson, Sr. Manager  
Spectrum Engineering  
SpectrumClearing@T-Mobile.com  
May 22, 2018  
Page 2

Marlene H. Dortch, Secretary, Federal Communications Commission, 445 12<sup>th</sup> Street, S.W., Room TW-A325, Washington, D.C. 20554. In the letter, Mr. Sharkey informs the FCC of a voluntary commitment that T-Mobile USA, Inc. ("T-Mobile") is making to compensate certain low power television stations that operate on a secondary basis and are unable to obtain a permanent channel in time to accommodate T-Mobile's rapid deployment of broadband service in the 600 MHz band.

We have called Mr. Sharkey several times and left messages for him to return our telephone calls with no response to date. We have talked to Mr. Hossein at the FCC about the options available. He has suggested that we retained a consulting engineer to perform a search.

Developers & Managers Group's financial resources have been depleted during the process of converting the stations from analog to digital. Unless your company provides assistance, we will have no other alternative than to cease operations.

Therefore, please accept this letter as a written request to T-Mobile from Developers & Managers Group to coordinate our operations by providing financial and/or technical assistance in identifying other frequencies in the area and the cost of moving to the new locations.

Your cooperation and assistance is appreciated.

Cordially,

Dr. Ernest L. Johnson, J.D., D.D.

CC: Barry McGill, Consultant  
Darrell Glasper, Capfund

**Subject:** RE: K38RN-D Alexandria, La and K45IM-D Monroe, La T Mobile  
**From:** Hossein Hashemzadeh <Hossein.Hashemzadeh@fcc.gov>  
**Date:** Thu, May 24, 2018 6:58 am  
**To:** "ernestjohnson@lacapfund.com" <ernestjohnson@lacapfund.com>,  
 "hossein.hashemzabeh@fcc.gov" <hossein.hashemzabeh@fcc.gov>  
**Cc:** Darrell Glasper <dglasper@bellsouth.net>, Barry McGrill <wb4ezg@yahoo.com>

Good Morning:

The correct call sign for Alexandria is K38NR-D.

The only channels that we can recommend for these two facilities are channel 29 for K45RM-D and channel 4 for K38NR-D. However, there might be other channels available if using lower power or different antenna and how far up in the tower the antenna is installed (RCAGL). I would recommend for you to consult with an engineer and have them to look to see if other channels are possibilities. When you figured out what channels you will be using, then you have to file displacement applications for these using our e-filing system and after filing the displacement applications, then you have to file legal special temporary authority requests to start broadcasting on the new channels. Let me know if any question.

Thx

**Cc:** "Ernest Johnson" <[ernestjohnson@lacapfund.com](mailto:ernestjohnson@lacapfund.com)>  
**Attach:** K38RN-D Equipment Prices.pdf

Thanks very much for the update. I was not aware of the October 15th deadline. Very helpful info. Attached is a copy of the equipment list and prices for K38NR-D. I know that additional equipment has to be purchased i.e. antenna, encoder, ect. No problem.

Also, I think we might need to price equipment for K4-D in Alexandria considering the short time between now and the October deadline. What do you think?

**To:** <KerneyThomasiii@gmail.com>

Hi Kerney,

I don't have your phone number, but feel free to call me if you would like to discuss.

Please see below next steps in order to proceed with your 399 applications. To be fair to all clients, the provided deadlines in red will allow us enough time to parse the data, ask questions, and input the 399 before the extended 11/14 FCC deadline. We will need the below for each station.

1. "Emergency 399 Intake form": DUE 11/7/19

a. Attached is our "Emergency 399" Intake Form which documents the original, interim (if applicable), and proposed final configuration. **Please have your contact complete every field on the form (N/A if not applicable).** Please note that engineering justification will be required when requesting a line change or TPO increase as the FCC might consider that an "upgrade". If there are any potential "red flags" in the form responses, we will need to set up a call with your in-field technical contact and the contract engineer to discuss associated risks. The accuracy and completeness of the Intake form is critical to the FCC Form 399 submittal and reimbursement. **Important note: The FCC will only reimburse a comparable configuration to the original equipment.**

2. Form 399 Eligibility requirements (please email each of the below for Anywave to prepare and submit):  
 DUE 11/7/19

a. Evidence that the station was transmitting for at least 9 of 12 months for at least 2 hours per day, and not less than 28 hours per calendar week between April 12, 2016 and April 13, 2017 (submit as many of the below as possible):

- i. **Master control automation system logs (referencing the station)**
- ii. **Programming/operating logs, transmission logs (referencing the station)**
- iii. **Commercial logs (referencing the station)**
- iv. **Program guides (referencing the station and including indication that the programs listed were aired);**
- v. **Tower/facility rental/leasing agreement (specifying site location)**
- vi. **Broadcast agreement**
- vii. **Third-party affidavits (Examples might include advertisers, content providers, Electronic Program Guide (EPG) services, or, in the case of translators, associated stations. The supplying third party should explicitly affirm the affiant's first-hand knowledge of the station's operations and that it met the minimum**

- b. After submission, an email will be sent to station and station will have 10 days to confirm banking info is accurate.
  - c. No reimbursement payment will be made if the bank account information in the CIAFM is not verified.
3. Submittal info: DUE 11/7/19
- a. FRN and password for LMS
  - b. Reimbursement contact information (if different than applicant info)
  - c. Quotes for any equipment already purchased or planning on being purchased.
4. Certify 399 ready for submittal: DUE 11/11/19
- a. After we receive all necessary data and prepare the 399 submittal, we will review with station contact to ensure accuracy.
  - b. Station can then enter LMS and click "Certify and Submit" for both the 399 Reimbursement Form and Eligibility Form.

Your urgency is greatly appreciated. If you have any questions do not hesitate to reach out.

Thank you,

Nick Solano

K04SA\_Form 399 Eligibility\_Final draft\_11.13.19.pdf

K04SA\_Form 399 Reimbursement\_Final draft\_11.13.19.pdf

Hi Kerney,

Your [399 Reimbursement forms](#) and [399 Eligibility forms](#) are ready for you to "Certify and Submit" in LMS for both K45IM and K04SA. The deadline to submit is now November 14<sup>th</sup>, however we do not recommend you wait until the last day to click submit.

I've attached the PDF copies of both forms for reference.

The forms were completed to the best of our ability based on our previous conversations, the Intake information provided to us, and sources believed to be reliable and accurate. However, many of the fields were filled in using generic answers and might not necessarily reflect each station's exact situation. **Please review carefully and remember you are certifying the information is correct so feel free to make corrections as you see fit.**

**Your next steps are to log in to LMS, open each form, and click "Certify and Submit" before the deadline tomorrow.**

As soon as the FCC approves your forms or reaches out for questions, we will begin the "Form 399 assistance – follow-up work" services portion of our quotes to begin the reimbursement process.

Thank you,

Nick Solano  
816-617-6012

Earnest,

We are available to send you invoices and begin building your transmitter. It is a good time to get things started as there will be a rush the longer we take to order.

Thanks

Hi Earnest,

I received your voicemail. We will begin our hourly services so we can assist you with your eligibility. Other stations are getting the same pushback. In looking at the document you provided, it does seem to show only a witness signature on the main assignment agreement. Do you have the fully executed version of the actual lease? To his point about the showing 9 months of broadcast, we need to show something that has dates or language in the original lease that states you need to be broadcasting, etc. Alternatively, we have had luck in just providing monthly utility bills from those dates (4/2016 – 4/2017). Do you have access to anything like that?

Nick

- 1) Documentation provided did not contain legally binding signatures from all parties. Lease agreement provided was missing signatures from all parties, and page 7 signatures appear to be from a different document. Please provide a copy of the agreement signature page with signatures from all parties. 2) Documentation provided did not establish transmission for nine (9) of twelve (12) months between April 13, 2016 and April 13, 2017.

The eligibility certification for Facility ID 70101 has been unlocked in LMS, allowing you to file a revised version if you believe you can address these issues.

**PLEASE FILE AN AMENDED FORM 399 WITHIN 10 CALENDAR DAYS.** Failure to do so will result in the rejection of this eligibility certification, precluding this station from receiving reimbursement.

If you have any questions, please respond to any correspondence from your reviewer at the Fund Administrator, or contact the Reimbursement Team at [reimburse@fcc.gov](mailto:reimburse@fcc.gov) or 202-418-2009.

Sincerely,

FCC Incentive Auction Repack Reimbursement Team
