

## RENEWAL CERTIFICATION

### ONLINE PUBLIC INSPECTION FILE

This certification is applicable to the following radio station licensed to KRZZ Licensing, LLC. (the “*Licensee*”):

<u>Station</u>	<u>Community of License</u>	<u>Facility ID No.</u>
KRZZ-FM	San Francisco, CA	1092

In preparation for the license renewal process, the Licensee discovered that a very limited number of documents were either missing from the file or not uploaded in accordance with the timing requirements of Section 73.3526. The missing documents have been uploaded to the station’s online public inspection file. To the Licensee’s knowledge, all other documents in the station’s online public inspection file have been uploaded in compliance with Section 73.3526 in all material respects.

The Licensee notes that its parent company, Spanish Broadcasting System, Inc. (“*SBS*”), suffered a company-wide ransomware attack on October 25, 2020. The ransomware attack affected SBS corporate headquarters and all radio and television markets, including San Francisco. All IT systems were compromised by the attack, including electronic mail, file storage, backup, traffic, various encryption and security systems, and virtually all other software and systems used by SBS. Restoration efforts began immediately, however, it took until March 2021 to re-image all infected computers and rebuild network infrastructure/servers. In certain instances, the timing of uploads to the station’s online public inspection file may have been affected by this attack.
