

Request for Waiver of Tolling Standard to Extend Construction Permit

West Virginia Educational Broadcasting Authority (“WVEBA”), licensee of low-power television translator station W08EE, Martinsburg, West Virginia (“W08EE” or the “Station”), respectfully submits the instant application to request a waiver of the tolling standard set forth at Section 73.3598(b) of the Rules of the Federal Communications Commission (“FCC” or “Commission”) to extend W08EE’s construction permit, LMS File No. 0000054634 (the “Channel 27 Displacement CP”). The Channel 27 Displacement CP is presently scheduled to expire on August 15, 2021. Based upon the special, rare, and exceptional circumstances below, WVEBA respectfully requests a waiver of the FCC’s tolling standard to extend the Channel 27 Displacement CP for an additional six months, until **February 15, 2022**.

I. Legal Authority

Pursuant to FCC rules, a station that requires additional time to complete construction beyond its initial construction permit may seek a waiver of the tolling standard set forth in Section 73.3598(b) of the FCC’s rules upon a showing of rare and exceptional circumstances.¹ The Commission may waive a rule where the particular facts make strict compliance inconsistent with the public interest, special circumstances warrant a deviation from the general rule, and such deviation will serve the public interest.² As explained below, such special, rare, and exceptional circumstances are present in the case of W08EE.

II. Background.

W08EE is affiliated with the PBS Television Network and is licensed to WVEBA, a public benefit corporation established by the State of West Virginia (the “State”) to provide non-commercial educational radio and television broadcasting services to residents of West Virginia.³ W08EE operates as part of the WVEBA television network, which includes full-power television stations WSWP-TV, WVPB-TV, and WNPB-TV (collectively referred to herein as the “Full-Power Stations”), as well as six other television translator stations, including W08EE. In addition, WVEBA holds the licenses for twelve full-power non-commercial educational radio stations and associated FM translator and FM booster stations.

In 2017, WVEBA learned that it would be required to transition the three Full-Power Stations to new channels as part of the repacking process, in addition to five of its TV translator stations that were displaced as a result of the incentive auction, including W08EE (these stations collectively referred to herein as the “Displaced Translator Stations,” and together with the Full-Power Stations, the “Stations”). Thus, over the last several years, WVEBA has been tasked with balancing the transition of three full-power television stations and simultaneously addressing the

Aug. 27, 2018) at ¶ 13 and n. 34. (“Stations may also seek a waiver of the tolling rule to receive additional time to construct in the case where “rare or exceptional circumstances” prevent construction.” (citing 1998 Regulatory Review - Streamlining of Mass Media Applications, Rules and Processes, Memorandum Opinion and Order, 14 FCC Rcd 17525, 17536, para. 42 (1999)).

need to find displacement channels for five translator stations, all while continuing to manage the day-to-day operations of its television and radio network.

As the Commission is already aware, WVEBA is a state-funded governmental entity with limited resources, and is required to comply with the State's laws and procedures regarding procurement of goods and services.⁴ These laws require, *inter alia*, that equipment purchases in excess of \$25,000 be put out for competitive bidding, a process that is time and resource intensive, and is managed by the state procurement office.⁵ Under rules established by the State of West Virginia Purchasing Division, WVEBA could not start the lengthy procurement process for the Stations until it had adequate funds on hand to pay the winning vendor.⁶ For WVEBA, this did not occur until March 14, 2019, when the Governor of West Virginia signed into law an appropriations bill providing WVEBA with \$7.36 million to implement the repack for the Stations.⁷

When the funding for the post-auction transition for the Stations was finally made available, WVEBA was necessarily forced to prioritize construction on the three Full-Power Stations first, all of which had earlier construction deadlines, before it could initiate work on the Displaced Translator Stations. WVEBA started with WNPB-TV, which was assigned to transition to its post-auction channel at the end of Phase 4 on August 2, 2019. With a staff of only three engineers for the entire WVEBA television and radio network, WVEBA simply did not have the resources to initiate the complicated State procurement process for the equipment required for the two other full-power stations until such time as the WNPB-TV facility was fully constructed – much less to begin that process for the five displaced translator stations.⁸ WVEBA's engineering staff has been further reduced since January 2019, and today there are effectively 2 ½ engineers to support the entire statewide radio and television network. As a result, construction on W08EE and the other Displaced Translator Stations could not begin until after the three Full-Power Stations were fully constructed, and was thus delayed from the start.

⁸ In most cases, the State's procurement office required WVEBA to submit separate technical specifications for the various equipment required for WNPB-TV, WSWP-TV and WVPB's post-auction facilities. Drafting the necessary technical specifications as required by the procurement office is a resource-intensive project, such that WVEBA could not dedicate staff to writing multiple specifications concurrently while still managing its day-to-day engineering needs and implementing the WNPB-TV repack. Indeed, WVEBA's small engineering team was tasked with balancing the repack schedule for all three WVEBA full-power television stations while concurrently managing the day-to-day engineering tasks for WVEBA's statewide network of television and radio stations, addressing unforeseen repairs (e.g., replacing two failed radio transmitters), and finding vacant channels for its five television translator stations that were displaced by the repack.

This initial setback was compounded by additional delays beyond WVEBA's control that arose during the construction process for the three Full-Power Stations, which, consequently, delayed WVEBA's ability to begin construction on W08EE. As an initial matter, the WNPB-TV construction project was quite challenging, as it involved installing the station's new post-auction main antenna via a gin pole in the midst of a West Virginia winter, including heavy ice that stalled installation efforts more than once. Despite these challenges, WVEBA successfully completed construction of WNPB-TV's post auction facility in February 2020.⁹

Once construction of the WNPB-TV post-auction facility was completed, WVEBA turned its focus to completing the post-auction facilities for its two other Full-Power Stations – WVPB and WSWP-TV – both of which were scheduled to transition in Phase 10. To this end, WVEBA had to work with the State procurement office on requisition requests that met the office's requirements for competitive bidding and complete the bidding processes required to obtain the equipment needed to complete construction on these stations – a process that, in some instances, took the Procurement Office much longer than WVEBA expected.¹⁰ Even once procurement was complete, WVEBA encountered further delays beyond its control, including delayed equipment deliveries and setbacks due to severe winter weather. For instance, GatesAir ("Gates"), the vendor from whom WVEBA purchased WSWP's channel 8 transmitter, had initially told WVEBA that the transmitter would be delivered in August 2020 but subsequently notified WVEBA that transmitter delivery would be further delayed because the necessary mask filter was not yet available. Despite WVEBA's efforts to expedite delivery of the transmitter, Gates did not deliver it to WVEBA until early October 2020.

Similarly, although WVEBA had been working diligently to complete construction on WVPB's post auction facility, it was significantly delayed by the onset of three significant winter weather events, including a snowstorm in mid-February 2021, an ice storm just a few days later, and a rain storm thereafter that flooded the roads leading to the site and temporarily rendered it inaccessible to the crew. Construction on the Full-Power Stations was further complicated due to the COVID-19 pandemic, which made it more difficult to secure the work crews needed to complete installation and construction. As a result of these delays, WVEBA ultimately did not complete construction on the last of its three Full-Power Stations until very recently on July 15, 2021.¹¹

III. Status of Construction on W08EE.

Despite the limitations described above related to limited engineering staff, scarce resources, and construction delays, WVEBA has made best efforts to begin the construction process for W08EE. W08EE historically operated on channel 8. After channel 8 was reallocated as part of the incentive auction, WVEBA submitted an application for authority to construct displacement facilities for W08EE on channel 27 during the FCC's Special Displacement

⁹ See WNPB-TV License to Cover (LMS File No. 0000106559).

¹⁰ For a full account of the delays encountered by WVEBA in completing the procurement process for WSWP-TV, please see LMS File No. 000151301.

Window.¹² The FCC granted this application on August 15, 2018 and specified a three-year period for W08EE to construct the channel 27 displacement facility.

In order to expedite the construction process and avoid further delays, WVEBA has entered into an open-ended, turnkey services contract with an outside vendor, Pillar Innovations (“Pillar”), pursuant to which the entire procurement, construction, and installation process for W08EE and its sister stations will be outsourced to Pillar.¹³ WVEBA expects that this solution will help to expedite the construction process for W08EE by allowing WVEBA to reduce the delays associated with the State purchasing process, as Pillar will be responsible for procuring all of the equipment and additional resources necessary to complete the transition to channel 27, as well as providing the work crews necessary to complete the installation process. At this stage, Pillar is currently preparing to perform a structural analysis and complete engineering drawings, which will then be submitted to a structural engineer for review and approval. Upon receiving such approval, Pillar will be in a position to begin ordering and installing the equipment necessary to complete the Station’s transition to channel 27. Although WVEBA has been warned by its vendor that there may be equipment shipping delays due to the current semiconductor chip shortage, WVEBA anticipates that construction on W08EE will be fully completed within six months, by February 15, 2022.

IV. Grant of this Request Will Serve the Public Interest.

In light of the special, rare, and exceptional circumstances described herein, waiver of the tolling standard to provide WVEBA with additional time to complete construction of the Channel 27 facilities for W08EE is warranted. Grant of this request to extend the Channel 27 Displacement CP to February 15, 2022 will not harm the public interest because W08EE has not yet received notice of displacement, and is still serving viewers using its existing channel 8 facilities.

42. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open hearth, basic oxygen, electric furnace, Bessemer or other steel making process. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
- c. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
- d. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

43. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a

“substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

Pricing Page Yearly Travel Costs:

REQUEST FOR QUOTATION EBAr68757
Broadcast/Communications Tower Site, Antenna, and Lighting Maintenance

section 3.1.7.6.1 defines travel time as:

“the amount of time required to reach a site and return (round-trip) when leaving from the Vendor’s office. This shall be calculated as the round-trip time from Vendor’s office to the Agency’s office as submitted on the Pricing Pages, Exhibit A, plus the round-trip time from the Agency’s office to the tower site as listed in Exhibit B, WVEBA Sites.”

Since the travel time between Agency offices and tower sites is the same for all vendors, only the round-trip time between Vendor’s office and Agency’s office is used to calculate a travel cost on the Pricing Pages. The bid travel cost is also based on two Vendor employees traveling. This means:

- The travel time on the Pricing Pages, TIME, will be the round-trip time from Vendor’s office to the Agency’s office (as submitted by the Vendor on the Pricing Pages).
- The hourly rate for travel time, RATE, shall be the rate submitted by the Vendor on the Pricing Pages.
- Est. Annual trips, TRIPS, is an estimated number of service calls expected annually for a district.
- Number of Vendor employees traveling to a site for a service call, TRAVELERS, shall be two (2) for bid comparison purposes.
- Yearly Cost of Travel = TIME x RATE x TRIPS x TRAVELERS.

Example:

- Round trip time from Vendor’s office to Agency’s office, TIME, is five (5) hours.
- Hourly rate entered by Vendor for travel, RATE, is \$75.00.
- Estimated number of annual service calls, TRIPS, is five (5).
- Number of Vendor’s staff traveling, TRAVELERS, is two (2).
- Yearly Cost Travel = TIME x RATE x TRIPS x TRAVELERS = 5 x \$75.00 x 5 x 2 = \$3,750.00

Note: The Pricing Pages supplied in Excel format will execute all calculations once the Vendor-required information has been entered.

REQUEST FOR QUOTATION EBAr68757
Broadcast/Communications Tower Site, Antenna, and Lighting Maintenance

Vendor should electronically enter the information into the Pricing Pages through wvOASIS, if available, or as an electronic document.
