

ENVIRONMENTAL STATEMENT:

The proposed facility complies with FCC Section 1.1306 as it will not have a significant impact and complies with the maximum permissible radio-frequency electromagnetic exposure limits for controlled and uncontrolled environments.

An RF Radiation Hazard To Human Study was completed and the worst-case Power Density for the 4-Bay Jampro Double-V circularly polarized antenna operated at 10.5kw ERP will be 54.6 uW/sq. cm. which is only 27.3% of the maximum allowable. A copy of the RFHAZ Study is attached.

The proposed facility will use an existing tower with no change in overall height.
