

### Online Public File

As of this date, all documents required to be uploaded to the station's public inspection file have been posted to the station's online public file.

However, the 2017 quarterly Issues/Programs Lists were inadvertently omitted when the station's public file materials, which had previously been placed in the station's paper public file, were uploaded in early 2018.

Once the omission was discovered in connection with a review of the station's online public file while preparing this license renewal application, the missing quarterly 2017 Issues/Programs Lists were posted immediately.

The failure to upload the 2017 quarterly Issues/Programs Lists was inadvertent since the station's other historic paper file documents were uploaded in 2018. In addition to the omissions, some other historic paper file materials, two more current subsequent Issues/Programs Lists and some political postings were uploaded late. However, in an attempt to ensure no further late uploads, the staff is working with the assistance of counsel to monitor the timeliness of all future postings.
