Temporary Authority)	

REQUEST FOR EXTENSION OF SPECIAL TEMPORARY AUTHORITY

Request Television, Inc. (“REQUEST”) by its attorneys, hereby requests an extension of the Engineering Special Temporary Authority granted by the Commission in April 2021 under File No.: 106686. Since grant of the original STA, REQUEST has diligently made progress on key milestones, and states as reasonable grounds for this Extension the following:

1. In October of 2020, REQUEST was granted a construction permit for a new tower site on a new digital channel (31 D) via LMS application File No. 117962.
2. On March 19, 2021, REQUEST was granted a Renewal of its License via LMS application File No. 123784.
3. With the renewal of the license as of March 2021 and the construction permit for the new tower site both secured, REQUEST proceed with plans to make the transition from channel 20 to digital channel 31D at the new location.
4. On April 30th 2021, the Media Bureau granted an Extension to the Engineering STA (LMS application 143777) to continue interim operations on channel 20.
5. In May 2021, the licensee signed the tower lease agreement for the new site. Over the summer, new equipment has been ordered.
6. At the present time (October 2021) an updated tower assessment is underway, and engineering services have been further retained to assist with refinements. This phase must be completed before commencement of construction, but will not be completed before Spring 2022. The new construction permit will not expire until October 2023.

7. Although REQUEST has diligently followed through on all required tasks, more time will be needed to complete the project. REQUEST therefore respectfully seeks an additional extension of the Engineering STA for an additional six (6) months to follow through with the processes for final modifications and construction.

Please contact me regarding any details as to the status of the project.

Respectfully Submitted on this October 8, 2021
