

**Non-Pro Forma Assignment Application
Related Applications Exhibit**

This application is one of two concurrently-filed applications seeking Commission consent to the assignment of certain full-power, FM translator, and FM booster stations. The two applications were necessary because some of the stations are noncommercial and some are commercial, and the LMS form would not distinguish that the application was feeable for the commercial stations but not the noncommercial stations. The transactions set forth in these applications are governed by a single asset purchase agreement which is being provided to the Commission herewith, and the parties anticipate consummating all of the transactions together on a single closing date. Accordingly, the parties respectfully request that the Commission staff process and review both applications at the same time.
