

CONSTRUCTED FACILITY

The W29FQ-D Channel 29 digital television translator broadcast facility was built-out pursuant to the underlying construction permit (File No. 0000131982) with exception to the antenna. The antenna authorized in the construction permit is a Dielectric model TLP-8A-R and the antenna actually purchased and installed is a Dielectric model DLP-8B which is considered an omni-for-omni swap and can be changed in a license application pursuant to 73.1690 of the FCC Rules. All other parameters were built-out pursuant to the underlying construction permit.

SPECIAL CONDITIONS

There are no special operating conditions depicted in the underlying construction permit; therefore, the Special Operating Conditions can be certified as “Yes” in the License Certifications section of the application.

CERTIFICATION

This technical statement was prepared by William T. Godfrey, Jr., Engineering Associate with the firm Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida, and has been working with the firm in the field of radio and television broadcast consulting since 1998.
