

WAIVER OF FCC RULES/POLICY

TRANSMITTER OUTPUT OF WVMG NEEDS TO BE HIGHER THAN THE 3 WATT MAXIMUM BECAUSE OF A LONG TRANSMISSION LINE RUN OF RG8 AND THE ADDITION OF A FILTER, POWER METER, CONNECTORS AND OTHER APPARATUS WHICH ARE IN THE TRANSMISSION LINE RUN. THESE ITEMS TOGETHER ADD A HIGH AMOUNT OF ATTENUATION, PLUS THE ANTENNA ONLY HAS A GAIN OF 0.441 x. THEREFORE A TPO OF 9.15 WATTS IS REQUIRED.
