

Extraordinary Circumstances Requiring Silence

Evangelistic Alaska Missionary Fellowship, Inc. was required to take KJNP-TV, Facility ID No. 20015, North Pole, Alaska, silent due to a number of circumstances which, taken together, made continued operation of the station in accordance with the Commission's rules impossible. Not only did the remote control of the station cease working, but the station experienced difficulties with both satellite reception of programming, as well as internet reception. Additionally, the station's EAS equipment was interfacing properly with its character generator, and a number of other technical issues cropped up. While any one of them would not be insurmountable, the combination of all of them at once, added to the station's extremely small staff size and somewhat remote location means that KJNP-TV simply did not have and has not yet gathered the necessary resources to make the repairs and adjustments that would be necessary for the station to resume broadcasting at this time. Accordingly, KJNP-TV is seeking extension of its authority to remain silent.
