

## **Purpose of Application & Technical Statement**

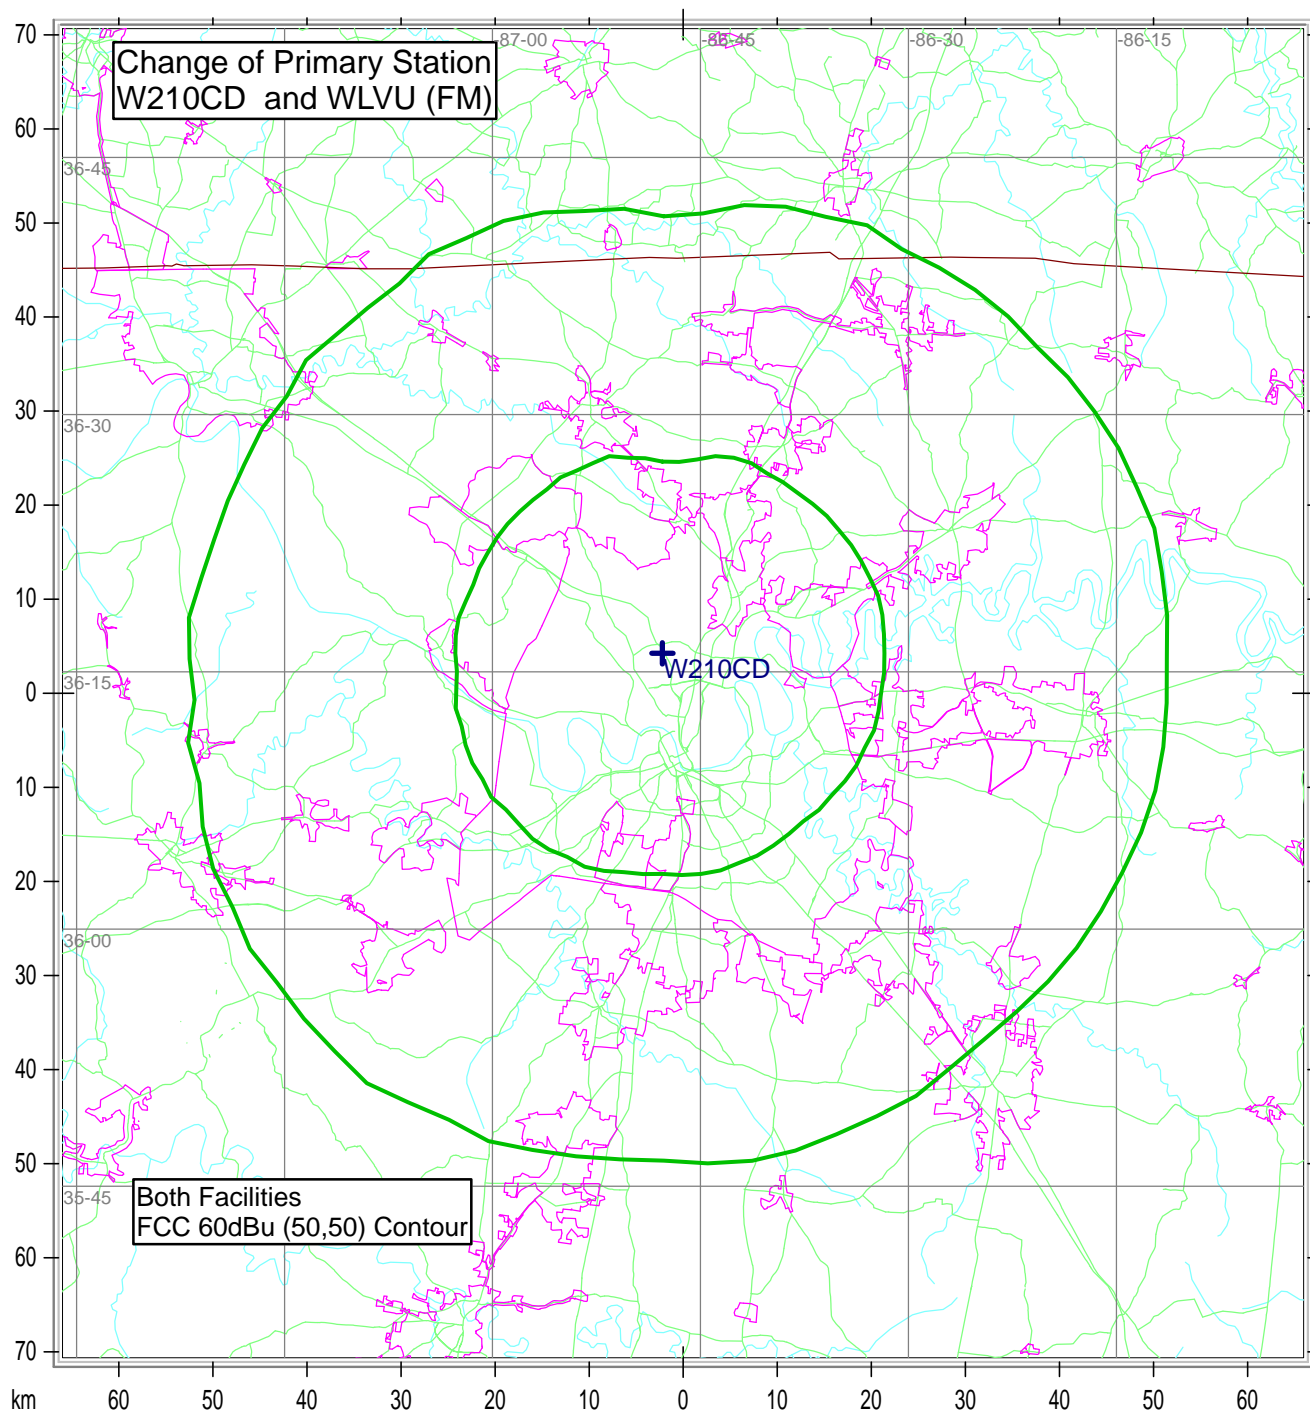

This application for new license for this facility reflects a change to a new primary station. As that change requires a showing for compliance with primary station contour and fill-in status of the translator, the applicant determined that a replacement license application was appropriate.

### **PRIMARY STATION**

The translator will repeat the HD-4 channel of primary FM station WLVU (FM) Belle Meade TN, FACID 26689. The primary station is licensed as non-commercial educational by BLED-20180212AAU and is appropriate to be a primary station for non-commercial educational translator W210CD.

The applicant has secured a written permission from Educational Media Foundation, licensee of WLVU (FM) to repeat the HD-4 channel on W210CD.

The attached map demonstrates that the proposed 60dBu (50,50) contour is fully encompassed by the licensed 60dBu (50,50) contour of the primary station.
