

Fargo Baptist Church
Proposed New Facility for Jamestown, ND
Point System Factors

Fargo Baptist Church is licensee of KFBN(FM), Facility ID 82193. The 60 dB μ (50,50) service contour for KFBN does not cross the service contour for the proposed facility, meeting the requirements for Diversity of Ownership.

The proposed facility will provide new NCE service, and total coverage to 16,554 persons (2010 Census) and serve 160.36 sq km of area in the vicinity of Gilman, IL.

Contour distances were calculated by using the contour calculation methods of 47 C.F.R. §73.313(c) referencing the NDGC 30 sec terrain database for elevation data, as implemented in the Commission's TVFMFS Fortran computer program. Contour distances from the proposed facility were calculated for each integral radial degree (360 total), with linear interpolation between values. Population data used block-level census populations from the US 2010 Census, counting all population using the centroid method approved by the Commission. Area was calculated by scanning for latitude/longitude points within the contour using a 0.04 sq km resolution, then adding the results together, excluding large bodies of water.

As demonstrated on page 2, the applicant qualifies as an established local applicant per 47 C.F.R. §73.7000:

FARGO BAPTIST CHURCH

CONSTITUTION AND BY-LAWS

DECEMBER 30, 2018

FARGO BAPTIST CHURCH

3303 23RD AVE SOUTH ~ FARGO, ND 58103

Existing Authorizations/Diversity of Ownership

The applicant is also licensee of KFBN(FM), Fargo, North Dakota, Facility ID 82193, and has no attributable interest in any other broadcast facilities. The principal community contours of KFBN and the proposed facility do not intersect, making this application eligible for credit for Diversity of Ownership.
