

WORLD FEDERATION OF PASTORS AND MINISTERS OF THE FULL GOSPEL,INC.

EDUCATIONAL STATEMENT

The WORLD FEDERATION OF PASTORS AND MINISTERS OF THE FULL GOSPEL,INC. has the objective to help through mass media in the development and well being of people and communities. Thus, we would provide a programming of general interest for all ages to educate, inform, and entertain our audience. Our programming would consist of educational programs related to culture, health, politics, public opinion, and of opportunities & activities in the area that we would reach. Additionally, we would include sports & news segments to maintain our audience informed about local and national news. We believe and support an integration of society as a whole and go against any type of discrimination. In that same way, we uphold the idea that every person deserves to be able to better themselves and have opportunities to advance in life. Therefore, as a media outlet we would work with the communities and areas we reach by promoting as well as being part of events to help people receive goods and services they need. These activities would include food distributions with the help of food banks, job fairs, and social activities. We would also be involved with local governments in order to help citizens be informed about their communities and at the same time be voice for citizens unto government. In all, we envision that through radio will be an agent of change and impact and improve society in order to improve lives.
