

### **Established Local Applicant**

Calvary Bible Church of Lapeer Michigan is a long-time nonprofit organization physically headquartered in Lapeer Michigan. As shown in the engineering exhibit, Calvary's headquarters in Lapeer, Michigan is 10-11 miles from the reference coordinates of the proposed Davison community of license -- well within the "local applicant" definition of "physically headquartered...within 25 miles of the reference coordinates for the community to be served." See 47 CFR Section 73.7000.

Therefore, Calvary qualifies as a local applicant for NCE point system purposes.

As shown in the NCE Eligibility Showing elsewhere in this application, Calvary's radio station ministry predates even the creation of the Federal Communications Commission. Calvary has been the licensee of Station WMPC(AM) since 1926 and the licensee, the Church itself, was established in 1840. Calvary's existing radio station, WMPC Gospel 1230 AM, is the oldest continuously operating gospel radio station in the entire country.

Therefore, Calvary qualifies as an established local applicant for NCE point system purposes.

Supporting documentations for these assertions can be found Calvary's history, which discusses its local status and its local headquarters in Lapeer, dating back to its founding, at this link:

<https://cbcl.org/History.pdf>

For the convenience of FCC staff, a PDF of Calvary's history, including citations therein, is attached to this application and will serve as documentation that Calvary qualifies as an established local entity for NCE point system purposes.
