

Directional Antenna Installation Affidavit

On Behalf of

Community Broadcasters, LLC

WQKI-FM

Orangeburg, South Carolina

I, Steward R. Albert do hereby certify that on this date, November 15, 2021, I personally supervised the assembly and installation of a Dielectric model DCRT4R directional antenna to complete a construction permit for the 95.7 MHz operations of WQKI-FM, Orangeburg, South Carolina.

Upon final assembly, the antenna was set for a Center of Radiation of 405 Feet and fed with no more than 806 Watts antenna input power, per the manufacturer's specifications, (TPO of 981 Watts) for a maximum lobe radiated power of 4.00 KW, as per the manufacturer's directional proof of performance, documented within the applicable license application hereof.

Alignment of the antenna was performed per Dielectric's supplied mechanical drawings to an azimuth of 180 degrees True. Alignment verification was performed by a licensed surveyor, who's affidavit is provided separately.

I certify that I have a Bachelor's Degree in Electrical Engineering Technology from the University of North Carolina at Charlotte, and have served as a chief engineer and broadcast consultant to dozens of AM, FM and Television facilities for over 46 years, and am fully qualified to oversee such directional antenna installations as this. I also have served as the SBE Frequency Coordinator for the Charlotte, NC regional area since 1986. My qualifications are a matter of record with the Federal Communications Commission.

A handwritten signature in black ink, appearing to read 'Steward R. Albert', with a large, stylized initial 'S' and 'A'.
