

W250AB Manchester, NH - Fac. ID No. 22889

CP Special Operating Conditions

For Station WGIR(AM), Manchester, NH, Fac. ID No. 35237: The Construction Permit has a special operating condition on it that requires that a partial proof of performance as defined in Section 73.154 of the Commission's Rules both before and after construction was completed to show that the AM station has not been adversely affected. An exhibit is attached documenting that this step has been accomplished. Therefore this CP condition is satisfied.

For Station WGAM(AM), Manchester, NH, Fac. ID No. 57088: The Construction Permit for has a special operating condition on it that requires the applicant to comply with 47 CFR 1.30002(a)&(b) regarding Tower construction or modification near AM stations. The condition designates WGAM AM as a station of concern.

WGAM AM is a non-Directional AM station operating on 1250 kHz. The wavelength for 1250 kW is 0.2398 km. WGAM is located 2.1 km away from the instant FM translator on a bearing of 253 degrees true.

47 CFR 1.30002(a) says the rule pertains to construction within 1 wavelength of a non-Directional AM station. 47 CFR 1.30002(b) is for construction near a directional AM station. Neither of these requires further consideration of WGAM AM. Therefore the CP condition is satisfied.
