

**PUBLIC FILE EXHIBIT**

Television Station KRWF, Redwood Falls, Minnesota, Facility ID No. 35585 (the "Station"), currently serves as a satellite station that rebroadcasts two commonly owned stations (KSTP-TV and KSTC-TV) in the geographically expansive Minneapolis-St. Paul Designated Market Area. In March 2018, the Station amended a number of children's programming reports that initially had been timely uploaded in order to add children's educational (E/I) programming that had appeared as part of the Station's re-broadcast of two of KSTC-TV's program streams and that had been omitted from the initial filings. (The relevant parent station KSTC-TV itself had timely uploaded its children's programming reports with all of its E/I programming into its own online public inspection file, so this information was readily available to parents, and all other interested parties, at all relevant times even prior to these amended filings.) In an abundance of caution, the Station took the administrative step to reproduce the relevant children's television programming reports of KSTC-TV into its own online public inspection file.

In addition, while the Station uploaded information regarding political advertising to the Station's online public inspection file, some materials were not uploaded timely. Promptly upon discovery, the licensee took corrective action to put in place additional procedures to ensure that all political advertising information is timely uploaded.
