Public File Exhibit

WKNL(FM) FCC License Renewal Application

As of this date, all documents required to be in the station's online public inspection file have been uploaded. Most were posted on a timely basis, with the exception of some political advertising postings, which were uploaded late.

The failure to upload on time some public file materials was inadvertent since, during the eight-year period under review, the station's other public file documents were uploaded by their required deadlines. However, in an attempt to ensure no further late uploads, the station's staff is working with the assistance of counsel to monitor the timeliness of all future postings.
