

## All-Purpose Attachment to FCC License Renewal Application

W243AI

Facil ID 77591

FRN 0008819674

### Certification of RF Compliance

The W243AI two-bay CP antenna is mounted above the building roof on a 20-ft pipe. The lower bay is approximately 10 ft above the roof. Other (land mobile) antennas exist on the roof. A survey with a Narda meter using a broadband conformal probe confirms the emissions of W243AI on the roof deck in combination with other emissions are substantially below the general population limit.

### Certification of Exemption from Fees

As W243AI is re-broadcasting an NCE station (WMVY Facil ID 175715), it is my understanding that W243AI is exempt from license fees.
