

SPECIAL CONDITIONS STATEMENT  
Renard Communications Corp.  
January, 2022

Renard Communications Corp. holds Construction Permit (“CP”) 0000139140 for the conversion of WNDR-LP, Auburn, NY (Fac. ID 41364) to digital facilities WNDR-LD, (Fac. ID 189863).

The CP stated a condition for AM station WMBO, Auburn, NY (Fac. ID 25001) to determine operating power by the indirect method, and prior to or simultaneously with the filing of the license application to cover the permit for WNDR-LD, submit antenna impedance measurements in a Form302-AM application for WMBO to return to the direct method of power determination.

In consultation with the Commission’s staff, and in consideration that the LPTV and AM stations are commonly-owned (see Attributable Interests Exhibit), the Commission has indicated it would accept compliance with Section 1.30003(a) of the Rules in lieu of filing a formal 302-AM application for WMBO.

In that regard, the antenna impedance of the WMBO antenna was measured before and after installation and it is stated that in compliance with Section 1.30003(a), the resistance component demonstrated a less than 2 percent change at the WMBO carrier frequency of 1340 kHz.
