Renee,

I reinstated the 86303. You should follow the instructions that Hossein gave you below.

81085 has expired so there is nothing to do there.

Kevin

Good afternoon Hossein and Kevin,

I'm still trying to clean up this record for WEKA.

Engineering STA App: 81085 is the one we wanted withdrawn and Engineering STA: 86303 is the one that the station resumed operations on.

Would you like to me to withdraw 81085 through LMS?

First go ahead and file amendment to pending STA to replace the corrupted files. Secondly, in this case you can send us a letter explaining the circumstances as to when and how the station went back on the air and we can update the records and will upload the letter to the records.

Hi again,

I continued to dig on this application and had understood previously the filing of an Engineering STA would trigger the status back to Licensed. The attachment in the pending Engineering STA is corrupt – it had said in the attachment that the station resumed on October 14<sup>th</sup>, 2019 pursuant to the technical specs outlined in the Engineering STA. In an effort to clean this record up, I tried to file a resumption in LMS and it won't let me due to the date parameters.

Do you have any suggestions on what I should do next? Sorry for the early Monday morning headache I'm giving you both. :/

**Subject:** WEKA

Good morning again Hossein and Kevin,  
I have a pending Engineering STA for WEKA, but see that its grant is probably hung up because of a previously granted Engineering STA. I went ahead and withdrew the granted Engineering STA this morning (see attached). Hopefully that cleans up the record for the updated Engineering STA to be reviewed, it is:

<a href="#">0000086303</a> Engineering	10/11/2019
STAPending, ActiveStatus Date:	
10/11/2019	

Thank you in advance!
