

AMENDMENT TO DISPLACEMENT APPLICATION FOR K220GH

Educational Communications of Colorado Springs, Inc., hereby respectfully submits this amendment to a previously filed displacement application for K220GH, now specifying operation on channel 202 instead of channel 287. This amendment also specifies a change in major lobe azimuth to 280 deg. true from present operation at 240 deg. true. The applicant is also requesting a power reduction from 75 watts to 50 watts to alleviate interference to KTPL and KMPZ.
