

**Application to Convert Station License to Next Gen  
KGHD-LD, Las Vegas, Nevada, ID (Fac ID 67963)  
On-Air Public Notice Waiver Request**

At the time that the station CP was being built out, the station was silent. As such, on-air notices could not be aired to advise viewers of the coming transition. After consultation with Evan Morris of the FCC's Media Bureau about the inability to provide prior on-air notices, the following notice is being broadcast daily up Station KHYZ(FM) (which serves the Las Vegas, Nevada Market) beginning on January 10, 2022, as well as on a scroll broadcast on Station KGHD-LD:

On January 10, 2022 low power television station KGHD-LD began broadcasting from Las Vegas, NV. To watch KGHD-LD you will need an over the air receiver capable of turning the ATSC 3.0 next generation television broadcast standard. Information available at FCC.gov.

The notice will be broadcast at least 30 days.

In light of the fact that the station was silent and that Obidia Porras followed the suggestion of the FCC staff to broadcast notice on local media of the forthcoming conversion to 3.0, Obidia Porras respectfully requests a waiver of the obligation to air prior notices on the station of the transition on KGHD-LD the ASTC 3.0 facility.
