

### **Amendment**

Cache County (the “County”), the proposed assignee of digital low power television station K17II-D, Logan, Utah (FIN 168494) (“K17II-D”), hereby amends the instant assignment application to advise the FCC of the County’s plans to relocate K17II-D and resume on-air operations. The County plans to close on the acquisition of K17II-D as soon as possible after the FCC grants the assignment application. The County will then immediately file an application to relocate K17II-D to an existing site for which the County has other translator operations. The County expects to resume on-air operations of K17II-D within 30 days of the grant of the construction permit application.
