

## DESCRIPTION OF AMENDMENT

This amendment to the pending application number 0000167388, facility ID 767736, for a new proposed NCE FM station at Greenville, Virginia (originally Waynesboro, VA) is being filed as an engineering solution to MX group 49, Attachment A, with FCC Public Notice with DA-21-1476, released November 29<sup>th</sup>, 2021.

The applicant, Rising Tide Broadcasting, Inc. (“RTB”) is now proposing operation on a first adjacent class A channel 217A from its original application on channel 218A to eliminate the overlap with a pending application at Lake Monticello, Virginia Ch. 218B, application no. 165581, facility ID 764203 in MX Group # 49. RTB is also proposing a new transmitter site and new community of license to be served.

The Technical Statement and technical data have been updated to reflect this new channel of operation as well as the Environmental Statement.

This amendment should be considered a minor change since it is proposing operation on a first adjacent class A channel to the original application, with prohibitive contour overlap to the original proposal, which will keep it mutually exclusive with the original application.
