

## Change City of License from Escondido to Borrego Springs

Since it was impossible to comply with the Mexican Treaty in Escondido, the city of license has been changed to Borrego Springs which is a census designated place in San Diego County, CA. According to the 2010 Census the population was 3,429. The community of Borrego Springs is surrounded by the Anza-Borrego State park which is the largest State park in California. Borrego Springs has churches, a bank, post office, markets, schools, local newspaper, a Chamber of Commerce, restaurants, a museum, State Park Headquarters and other commercial enterprises. Currently Borrego Springs has only one licensed radio station. A second FM station would serve the public interest in Borrego Springs and surrounding areas. Please refer to the attached photos.
