International Scripture Ministries, Inc.
New Non-Commercial Educational Station
Class A, Channel 212, Ruidoso, NM
33-23-6.0 N, 105-39-43.0 W – ERP = 0.7 KW (H&V) – RCAMSL = 2333 Meters

The applicant seeks an amendment to reduce ERP to 700 watts to create a construction permit and resolve MX Group #157 to create a singleton application for a new NCE Station serving Ruidoso NM on Channel 212. The instant application is an amendment to technically settle and unilaterally clear NCE Filing Window MX Group #157. The applicant is specifying only a reduction in Effective Radiated Power. There are no other parameter changes specified. The community coverage maps, area and population maps and the technical narrative exhibit have been changed demonstrate compliance for the new specified channel.

In addition to these changes, in the Points System/Tiebreakers section of the application, the number of pending applications has been revised from 6 to 5 to account for a recent CP grant and the number of construction permits has been revised from 0 to 1 to account for the same recent grant.
