

MyBridge Reason for Amendment Scottsbluff, NE

This Minor Modification Amendment to file #0000166024 is being submitted to remove Fac. ID #763260 from MX Group 140. The applicant proposes to move from Channel 211 to Channel 204 on ASR 1243780 with a directional antenna at 53 meters at a power of 60 kW to eliminate any overlap with other applicants in the MX group or any existing authorized station. By this minor modification the MyBridge application is no longer MX'd in Group 140 and can be granted as a singleton.

This is a minor change, in-class modification, Per §73.3573(a)(1)(iv) allowing existing commercial and non-commercial licensees and permittees to request Rule Making Proposals and Allotment Petitions as a part of the electronic FCC filing process, with the requested "channel substitutions for authorized facilities being treated as "minor" changes".

This amendment is not part of any settlement agreement and MyBridge has received no financial reimbursement from any MX group member or anyone with an attributable interest.

A new Allocation Study, Environmental Assessment, and §73.515 Showing have been uploaded to demonstrate this.

All population representation is from the 2010 Census data.

No other changes are being made at this time.

The Reasonable Assurance letter was inadvertently not uploaded. This amendment corrects this.
