

WJUX(FM) Online Public Inspection File

Q2 2018 Issues/Programs Lists: During the preparation of this application, an audit of the station's OPIF was conducted and it was discovered that while in the OPIF, the Q2 2018 Issues/Programs lists were uploaded late. While the manager responsible for reviewing these reports is no longer with the station, the licensee believes that the late uploads were the result of training of new personnel on how to prepare the quarterly reports and what elements must be included in each report.

The licensee takes its OPIF obligations very seriously and implemented procedures in 2018 to ensure that such late uploads do not occur again.
