Silent Notification

On February 3, 2022, WCNC-TV, Inc. ("Licensee"), the licensee of W17EE-D, Lilesville, NC, discovered that the translator was offline. Station personnel have determined that the Larcen 41D2274G1PS 50 Volt power supply used to power the amplifier in the transmitter had failed. Because the original 50 Volt power supply module is no longer manufactured, Licensee sent the unit to Maple Leaf RF for service to retrofit a currently available model into the system. Licensee received the retrofitted unit on the afternoon of February 14, 2022. Assuming no further equipment failures are identified in the course of completing repairs, Licensee intends to install the unit and return the station to service on February 15, 2022.
