

Station's Online Public Inspection File

To licensee's knowledge, the station's online public inspection file currently contains all items required to be placed there pursuant to the FCC's rules (47 CFR § 73.3527). However, due to inadvertent error, the station uploaded two items in an untimely matter: the station's quarterly issues and programs lists from the third and fourth quarters of 2014. These documents had been timely placed in the physical public inspection file located at the station and were promptly uploaded to the online public inspection file upon discovery of the error. The station has put into place procedures to help ensure timely future uploading of documents to the station's online public file.
