

ENVIRONMENTAL STATEMENT  
Metro TV, Inc.  
March, 2022

From an environmental perspective, the proposed construction would involve only a replacement of the existing transmitting antenna at approximately the same height on the tower with no change to the transmission line or any other changes to the structure and would have no impact on the environment.

It has been determined through the Commission's RF exposure worksheets, OET Bulletin 65 and any supplements that the proposed facilities comply with all RF exposure guidelines.

The power of other facilities on the tower will be reduced or operation ceased as needed per OET recommendations while tower workers are in the vicinity of the various antennas.
