KUVN LICENSE PARTNERSHIP, LP, GARLAND TEXAS.
TELEVISION STATION KUVN-DT, FILE NUMBER 0000074930
REQUEST FOR ATSC 3.0 LICENSE**

This exhibit supports an application by KUVN License Partnership, LP, licensee of full power digital television station KUVN-DT, Garland Texas (KUVN-DT), for modification of its license to reflect carriage in ATSC 3.0 (“3.0”) “Next Generation” TV format on ATSC3.0 “Lighthouse” station KSTR-DT, Irving, TX, using KUVN’s own call sign and PSIP.

KSTR-DT has been operating as an ATSC 3.0 Lighthouse station since April 5, 2019, initially under an experimental STA supporting a Single Frequency Network development with other broadcast partners in the Dallas DMA and subsequently as a fully licensed ATSC3.0 station since 2020.

Historically, KSTR-DT, an affiliate of the Unimas Network, has carried the signal of KUVN-DT as a multicast stream, to help ensure the greatest over the air availability of Univision Network programming in the market. This multicast carriage continued after grant of the experimental STA and after the Commission licensed KSTR to operate in the ATSC 3.0 format, with KSTR broadcasting the signal of KUVN using that station’s call sign and PSIP in ATSC 3.0. KUVN files this application to memorialize this carriage.
