Hi John,

I just wanted to update you. I called Dekalb permitting to ask the status and how much longer it might be before the permit is processed and they were a COMPLETE stonewall ... they refuse to give any information. "I'm sorry I can't tell you anything." I tried for general info...just historically the range of time it might take and she was a professional in obstructive messaging. Everything is submitted, just in hold mode right now. I'll fill you in as soon as I hear anything.
