

All-Purpose Exhibit

This exhibit is to advise the Commission that as of March 21, 2022, the WIFS mask filter began failing/arching at higher power levels resulting in the station running at 60% TPO. The station has ordered and anticipates an April 6th arrival of a replacement mask filter.

Should there be a delay in the arrival of the replacement mask filter or if any unforeseen issues should delay bringing the station back to normal, licensed operations within 30 days, a request for STA will be filed.
